Happy New Year To The PCEA Triangle Chapter Membership!

This month marks the beginning of our New Year’s PCEA Triangle Chapter Membership Drive. For the month of January the board is asking for each member to invite a guest to attend the January 16 Membership Meeting. This is a great opportunity for our guests to network with our membership outside of jobsite and office meetings.

January 16 Johnny Carino’s, Brier Creek

This month Terri Burdick from Waste Industries will be presenting a Program on Construction Waste Management and Recycling. Social starts at 6:30 PM

PCEA 2014 National Convention

The 2014 PCEA National Convention will be held at the Wyndham Oceanfront Hotel in Virginia Beach, VA from April 30 through May 4. Convention Chair Cebert White and his committee have been working hard for months to make this a convention second to none! More information to come, make plans to attend this great convention.
PCEA Chapter Nominations For 2014-2015 Officers
Nominations are open for PCEA Triangle Chapter Officers Positions for the 2014—2015 term.

PCEA Triangle Chapter Open Officers Positions
President Elect
First Vice President (Membership)
Second Vice President (Speakers)
Secretary
Board Members

Please consider nominating prospective candidates for the above office positions. Active participation in chapter board activities is a rewarding and enjoyable experience that is vital to carrying out our mission of promoting the construction industry through education. This does not happen without your participation and support. Please contact President Marc Marotta and help us to put together a strong slate of candidates.

Construction Spending Increased 5.9 Percent Between November 2012—2013

Total construction spending increased between October and November for the year amid private sector growing demand, according to an analysis of new Census Bureau Data collected by the AGC of America. Public Spending was held back during the same time period by declining public sector investments.
BIM Forum Releases Level of Specification Development

The BIM Forum released the first of its kind standard, establishing a means for defining how complete Building Information Models (BIMs) are at different stages of the design and construction process.

The new standard, known as the Level of Development (LOD) Specification, was developed under an agreement with the AIA and uses the fundamental LOD definitions developed by the AIA for its G202-2013 Building Information Modeling Protocol. The specification allows everyone involved with construction projects to clearly articulate how detailed model elements for the different building systems are or need to be throughout the design and construction process. More information can be found and downloaded from the bimforum.org/lod website.
